Understanding Your Belay Summit™ 2.0 Test

Summit 2.0 is a test your doctor orders to help better understand your suspected brain or spinal tumor. It looks at the genes in your tumor cells through a liquid biopsy, which helps guide how your care team makes decisions. This information can help your doctors learn more about your diagnosis, explore treatment options, and understand how your care may change over time. This test is one more tool to support you and your care team as you move forward together.

Two additional tests, Ascent™ and Vantage™, may be ordered along with Summit 2.0, providing more detail about your tumor. Your doctor can help you decide whether the tests below are right for you. All test offerings may be run on the same spinal fluid specimen.

Ascent

Ascent looks at changes in your tumor's chromosomes. Chromosomes carry genetic information, and changes such as gains or losses can give important clues about how a tumor behaves and how it may respond over time.

Vantage

Vantage checks for *MGMT* promoter methylation, which can help doctors understand how a tumor may respond to temozolomide (TMZ).

A PATIENT GUIDE

Testing for Suspected Brain and Spinal Cord Tumors

BELAY DIAGNOSTICS

At Belay Diagnostics, our mission is to serve patients and those who care for them.

Belay Summit™ 2.0

Why did my doctor order this test?

- To aid in diagnosis
- To better understand how your tumor is unique
- To help decide on the best treatment
- To see how treatment is working
- To monitor changes as time goes on

How is this test done?

- This test uses cerebrospinal fluid (CSF)
- CSF cushions your brain and spinal cord
- CSF is collected through a procedure called a lumbar puncture (also known as a spinal tap) or by Ommaya reservoir
- This is a commonly performed procedure at your doctor's office, in an outpatient clinic, or in the hospital if you are admitted

What will my results show?

- If your suspected tumor is likely benign or malignant
- Any genetic changes specific to your tumor to help guide your care
- What treatments may work for you
- Clinical trials which you may qualify for

Belay Promise

Our Commitment to Affordable Testing for All

We believe that everyone deserves access to the same tools for their care, and our customer service team will work hand-in-hand with you before your test is performed. We will:

- Run your insurance benefits
- Provide your cost ahead of time
- Compare insurance and self-pay options
- Explain our income-based financial assistance program and consider hardship circumstances for those patients who qualify based on our established hardship criteria.

Our Values at Belay Diagnostics

Trustworthy

Clinically validated testing where accuracy is not optional

Collaborative

Working together with clinicians to find breakthroughs

Patient-Focused

Every decision is made with patients in mind

Navigating Care Decisions

Questions to ask your care team

- Can you help me understand my Summit 2.0™ results?
- What do the test results reveal about my tumor?
- How do my results help guide my treatment?
- Do my results change my outlook?
- Could this test be repeated in the future?
- What are the next steps for my care?
- Whom can I contact if I have questions now or in the future?

If you have more questions, please reach out to us. **You are not expected to understand everything right away. We are here to help you and your care team.**
